

Flowcode

How do i give out Student licences as a school?

First, log in to your Matrix account here:

<http://www.matrixtsl.com/accounts/login.php>

Please Note this is NOT your old v6 schools login details, if you are unsure as to what your Matrix account username and password are, please contact us

Once logged in, look for the "**Student licences**" option under "**Academic Options**"

Once there you can add Students individually by typing the email addresses of a number of students into the text area. If you are adding multiple students, please separate the email addresses by putting them on their own line.

eg:

student@school.com

student2@school.com

student3@school.com

Flowcode

etc..
