

Programming Embedded PIC Microcontrollers using Assembly, C and Flowcode

Example pages

This Distance Learning Course contains the following chapters (click link below for an example page):

1. Background

<http://www.elektor.com/Uploads/2010/1/Background---page-13.pdf>

2. Contents of the box

<http://www.elektor.com/Uploads/2010/1/Contents-of-the-box---page-17.pdf>

3. Digital Ports

<http://www.elektor.com/Uploads/2010/1/Digital-ports---page-45.pdf>

4. Serial Communication (RS232)

<http://www.elektor.com/Uploads/2010/1/Serial-communication---page-121.pdf>

5. Analog Signals

<http://www.elektor.com/Uploads/2010/1/Analog-signals---page-187.pdf>

6. Pulse Width Modulation

<http://www.elektor.com/Uploads/2010/1/Pulse-Width-Modulation---page-237.pdf>

7. Timers/Counters/Interrupts

<http://www.elektor.com/Uploads/2010/1/Timers-counters-interrupts---page-275.pdf>

8. Memory

<http://www.elektor.com/Uploads/2010/1/Memory---page-335.pdf>

9. LCD Display

<http://www.elektor.com/Uploads/2010/1/LCD-display---page-379.pdf>

10. I²C Communication

<http://www.elektor.com/Uploads/2010/1/I2C-communication---page-425.pdf>

11. SPI Communication

<http://www.elektor.com/Uploads/2010/1/SPI-communication---page-459.pdf>

12. USB Communication

<http://www.elektor.com/Uploads/2010/1/USB-communication---page-495.pdf>

13. Configuration (Fuses)

<http://www.elektor.com/Uploads/2010/1/Configuration--fuses----page-539.pdf>
